Stuart Crawford is an inventor for Planet Tree Viewer and Prevision/Pioneer. I'm assuming your referring to the Prevision/Pioneer IDF's (prepared by the product manager)? Yes, I believe the inventors feel that one of them (not sure which one) is an "umbrella" idea, whereas the other one is more specific... the product manager explained that he wasn't too sure how to fill out the IDF's because of the complexity of the technology so he forwarded those additional materials (PPT presentation, positioning doc, etc.) in the hopes of differentiating/clarifying the two. Let's hope they can clear it up during the phone conference on 10/3.

Lori

Lori:

Got it.

Michael

P.S. The three Stuart Crawford disclosures seem related. In fact, two are nearly identical.
